Hello,

We'll get your order with many thanks.

Sorry to bother you, but there are 2 things that we want to confirm with you about your SMT order before proceeding.

1 Since we are not so sure about the polarities of the components D901 are correct or not. Could you please kindly check if the polarities and placements of the components are correct in the below picture? Is it okay to proceed with production?

2 The pins of SW1 exceed the pads a bit, would you like to solder it?

Your early reply will be highly appreciated, thank you so much!
